

KVM

Dual-View KVM Switch

Supports two separate displays simultaneously

Productivity AT Your Fingertips

For many people, striving to achieve the highest amount of productivity from their computing resources is a never ending goal. For some, such as financial traders, just a slight edge is enough to keep their profits flowing. For others, such as architects and engineers, maximizing their computing power helps them build fast~stronger~cheaper mousetraps. Most users have found installing dual displays in their computers significantly improves their daily business.

Moving a step further than merely having dual displays in a single PC, Aten's Multi-port Dual View KVM switch allows you to harness the power of up to four dual display computers with only one keyboard, video, mouse and speaker system. At the touch of a button or press of a hotkey you can have instant access to all your computing devices. In addition, KVM switches benefit the user by saving desk space and reducing costs by eliminating redundant equipment.

Dual View KVM switches are ideal for network administrators, financial traders, facilities managers, architects, engineers, 3D CAD designers, researchers, gamers, music/video editors, call center personal, educators and most power users. No matter how technology fits into your world, ATEN KVM switches will help you maximize your time and resources.

Features:

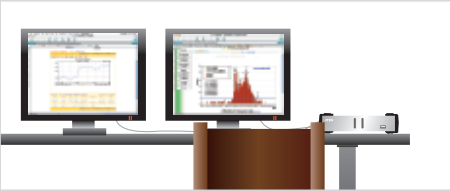

- Allows one keyboard, mouse, speaker, mic and two displays to control four dual display computers.
- Integrated USB Hub
- Multiplatform compatibility MAC, SUN, PC (Windows, Linux and most others)
- Bi-directional switching and flexible interoperability permits independent PC, peripheral and audio functionality
- Supports multimedia USB keyboards and multi-button mice (drivers may be required)
- Supports 2048 x 1536 maximum display resolution
- Programmable hotkey operations
- Flash upgradeable

master view™ 2/4 Port Dual-View KVM Switch CS-1742 / CS-1744

Ideal for:

Financial Traders

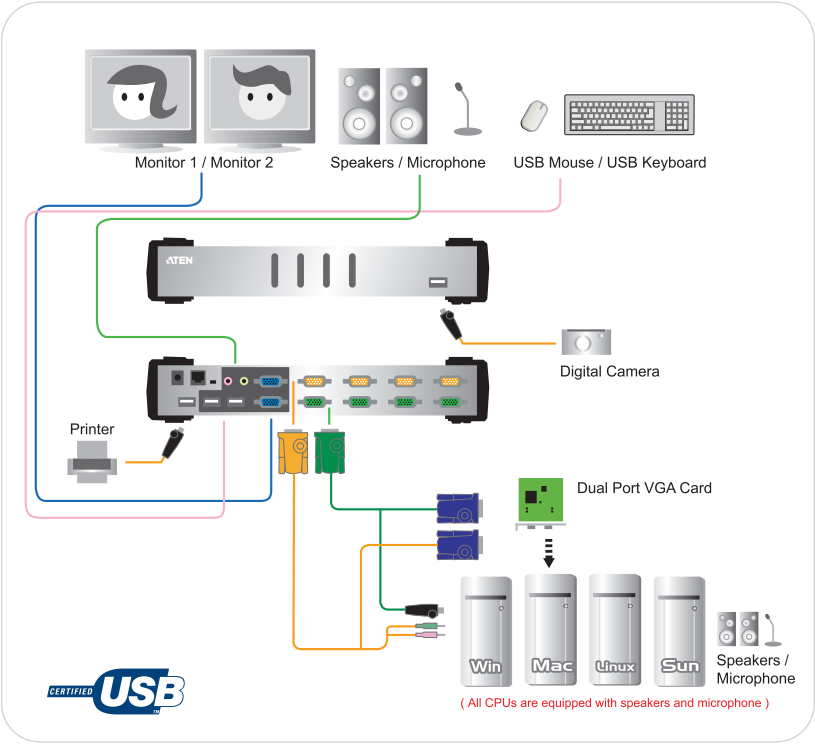

Art Graphic Designers

Gamers

Connection Diagram:

For maximum functionality, this switchbox requires computers equipped with dual video outputs.

Specifications:
