

WP-S1100

Wireless 802.11 b/g/n Projector Server

Presentation Mode

The WP-S1100 is designed for users to share a projector or a video device (monitor, TV set...) in a wired or wireless network. The WP-S1100 make it easy to share a single projector/video device among presenters (up to 16) through Ethernet network (wired or wireless). No video cable (VGA or HDMI) is needed between the projector/video device and the computer. Just use wired or wireless network connection to connect with the WP-S1100 and the screen contents on your computer display will be presented to the projector/video device screen. During the presentation, other presenters can access internet via the WP-S1100 when it is connected to a router or gateway.

Video Mode

The WP-S1100 supports many video formats, such as MPEG1, MPEG2, MPEG4, even the latest H.264. It can playback the video files from the computers in the wired/wireless network. It means the video file is transmitted over the wired/wireless network to the WP-S1100 then playback on the projector/video device screen.

HDMI and VGA

WP-S1100 built in HDMI and VGA interface. You can connect with projector, CRT display, LCD display, or TV set that support VGA or HDMI video input.

Supports wireless 802.11n & WPS button

The WP-S1100 supports the latest 802.11n wireless technology. It can deliver real time XGA/XVGA video with high resolutions in 32-bit color. The wireless transmission is protected by WEP64/128bit, WPA/2 encryption. Besides that, WPS (Wi-Fi Protected Setup) button simplifies the steps to configure encrypted wireless connection.

Session Login Code to protect unauthorized access

The WP-S1100 dynamic login codes can deny access from unauthorized users.

Remote Controller & Friendly Web-Based User Interface

The WP-S1100 is easily installed and applied by administrators and presenters with its web interface. In a conference meeting, the moderator can switch to the next presenter via remote controller easily.

NETWORK SETUP DIAGRAM AND RELATED PRODUCTS

An example of how the WP-S1100 can be setup:

- Connect the VGA or HDMI port of WP-S1100 to your projector / video device.
- Connect a computer to the WP-S1100 via wireless and setup the connection with the utility.
- You can also access Internet via WP-S1100 while presenting. (The WP-S1100 needs to connect to Internet.)
