New Product Announcement – Copper Verification and Testing

MicroMapper™ Pro VDV Cable Tester

The new MicroMapper Pro simplifies voice/data/video cable testing with a "quick check" test for twisted pair and coax connectors to TIA568A/B specifications. Quickly and reliably test terminations, length, cable ID, and location with just one tester. Full wiremap, including split pair and distance to break, are clearly displayed on a large LCD. It features built-in analog toning to locate and isolate wire pairs during installation. MicroMapper™ Pro is a durable tester that comes in a small, user-friendly package, making it a convenient tool for any job.

Features/Benefits

- Verifies voice/data/video cable wiremap with a "quick-check" test
- Tests twisted pair and coax connectors without adapters
- Locates cable with built-in analog toner
- Identifies cable with up to eight optional cable IDs
